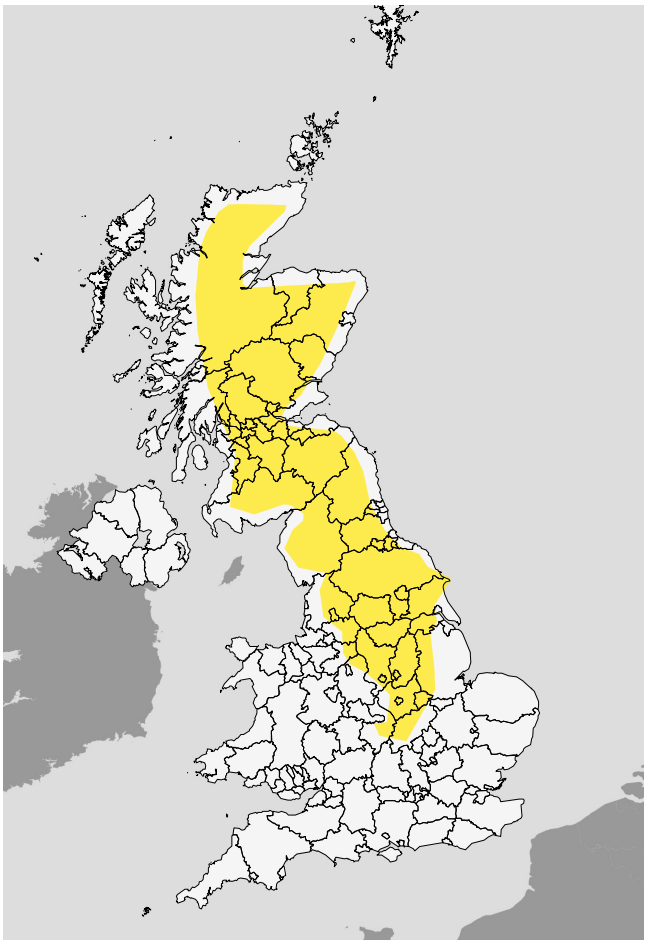
Yellow warning
Snow & Ice

Between
00:00 Sat 16 Jan 2021 and
18:00 Sat 16 Jan 2021



A band of rain and heavy snow may lead to travel disruption

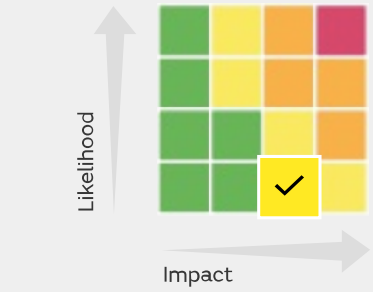
What to expect

- There is a small chance of travel delays on roads with some stranded vehicles and passengers, along with delayed or cancelled rail and air travel
- There is a small chance that power cuts will occur and other services, such as mobile phone coverage, may be affected
- A small chance of injuries from slips and falls on icy surfaces
- A small chance that untreated pavements and cycle paths become dangerous, posing a greater risk of injury

Further details

An area of rain pushing eastwards is expected to turn to snow in places.

Snow is likely to fall to low levels over east Scotland and northern England for a time on the leading edge of the rain before the snow level rises to above 300-400 m by mid morning. 1-3 cm is possible at low levels here but is more likely at higher elevations where 5-10 cm of snow may accumulate above 200 m and possibly 20 cm on highest routes. Icy stretches are also likely with rain and wet snow falling onto sub zero surfaces at times.



Very low likelihood of medium impacts

Issued at 11:14 Wed 13 Jan, 2021 Updated at 10:20 Fri 15 Jan, 2021

Yellow warning
Snow & Ice

Between
00:00 Sat 16 Jan 2021 and
18:00 Sat 16 Jan 2021

Further Details (continued)

Further south the most likely scenario is for rain though there is a small chance of snow falling down to 150 m or so leading to 2-5 cm in places.

Reason for update

The warning has been updated to extend the warning southwards and to start and finish earlier. Parts of Lincolnshire have also been removed from this warning but are now covered by a different snow warning
